

- Electropneumatic positioner for pneumatically actuated process valves
- II (1) 2 G EEx ia IIC T6 approval
- PROFIBUS PA
- HART protocol

Type 8635 can be combined with...

Type 2712

Globe valve

Type 265

Globe valve

Type 3210

Part-turn actuator

Type ST20

Temperature transmitter

The SideControl Positioner Type 8635 is an electropneumatic positioner for pneumatically actuated process valves with linear or part-turn actuators. It is available in the versions 8635 PA and 8635 S. Both versions are executed in two-conductor technology. With Type 8635 PA, communication and energy supply are via PROFIBUS PA whereas with Type 8635 S, the input signal serves for setpoint transmission and energy supply of the device simultaneously. Alternatively with Type 8635 S, communication may be via HART protocol.

Signal processing, control and actuation of the internal positioning system are accomplished with microprocessor-controlled electronics. The software function Autotune implemented therein enables automatic adaptation of the positioner to the control valve in use.

The positioner is parametrized and operated comfortably via three operating keys and a plain-text display, or with Engineering-Tools via PROFIBUS PA (Type 8635 PA) or optionally via HART protocol (Type 8635 S). It is possible to set up a decentralized control system if a process controller with PID characteristics is used (Type 8635 S).

As an option, the SideControl Positioner Type 8635 can be supplied with approval for use in the Ex area (Zone 1) to ATEX. Because of its compact and robust design, the housing is suitable for use in chemical and process engineering.

Technical data	
Housing material	aluminium, hard anodized and plastic coated
Other external parts	stainless steel V4A
Seal material	NBR, Neoprene
Control medium	Instrument air DIN ISO 8573-1 Class 5 ($\leq 40 \mu\text{m}$ particle size) Class 5 ($\leq 10 \text{ mg/m}^3$) Pressure dew point min. 10° under operating conditions Class 3 ($\leq 1 \text{ mg/m}^3$)
Control air temperature	$-25 \dots +60 \text{ }^\circ\text{C}^{(1)}$
Ambient temperature	$-25 \dots +60 \text{ }^\circ\text{C}^{(1)}$
Supply pressure	$1.4 \dots 6 \text{ bar}^{(3)}$
Air flow capacity²⁾	55 l/min at $1.4 \text{ bar}^{(3)}$ 170 l/min at $6 \text{ bar}^{(3)}$ for pressurizing and venting
Intrinsic air consumption	0 l/min
Positioning range	Linear actuator 3 ... 130 mm Part-turn actuator 0 ... 120°
Position sensor system	high-resolution, conductive plastic, rotary potentiometer
Operation	operating keys and plain-text display
Communication	Type 8635 PA PROFIBUS PA to IEC 1158-2 Profile B for actuators Version 3 Type 8635 S HART communication (optional)
Operating software	Type 8635 PA <ul style="list-style-type: none"> ▪ SIMANTIC PDM ▪ FDT⁴⁾ interface is being prepared for HART communication ▪ others on request
Electrical connection	2xM20x1.5 bushing clamping range 6 ... 12 mm screw terminals for $0.14 \dots 1.5 \text{ mm}^2$

Technical data (continued)

Technical data	
Electrical data Type 8635 PA	
Operating voltage to Ex segment coupler to segment coupler	9 ... 15 V DC (Ex)
Operating current	9 ... 24 V DC (non-Ex)
Fault current protection	12 mA without FDE, from bus 5 mA (FDE)
Electrical data Type 8635 S	
Current supply for electronics	via setpoint signal 4 ... 20 mA
Burden voltage	< 10.2 V DC
Setpoint setting	4 ... 20 mA or HART

Technical data	
Control air sockets	G 1/4 NPT 1/4; RC 1/4 on request
Mounting kits for linear actuator for part-turn actuator	to Namur recommendation to DIN IEC 534 T6 to VDI/VDE 3845
Mass	ca. 1.5 kg
Type of protection	IP65 to EN 60529
Type of ignition protection	II (1) 2G EEx ia IIC T6 to DIN EN 50020
Certification	
Type 8635 PA	to ATEX 2038 (PTB03)
Type 8635 S	to ATEX 2027 (PTB04)
Conformity	▪ EMC-89/336/EEC

¹⁾ Up to +65 °C temperature class T4/T5 or without EEx i approval.

²⁾ May be adapted to actuator size with throttle screw.

³⁾ Pressure data in bar; overpressure to ambient.

⁴⁾ FDT: Field Device Tool

Other electrical data

	Function values	Permissible maxima as per Certificate of Conformity				
		8635 PA	8635 S		8635 PA	8635 S
Power Supply	U	9 ... 15 V	10.2 V	Ui	15 V	30 V

- Data given without guarantee of accuracy.
- For dimensioning and operation of intrinsically safe circuits, the user/owner is responsible.

Software functions (depending on the device configuration chosen)

Type 8635 PA / Type 8635 S

- Automatic commissioning of control system
- Parametrization of the positioner
- Automatic or manual entry of characteristic curve for correction of operating characteristic
- Setting of the tight-closure or maximum stroke threshold
- Stroke limitation
- Limitation of positioning speed
- Dead band
- Direction of action of the controller setpoint
- Signal range splitting (split range up to 4 times)
- Setting of direction of movement
- Definition of a safety position
- Calibration of input and display
- Configuration of binary input
- Code protection for settings/operation
- RESET of factory settings

Technical data (continued)

Software functions (depending on the device configuration chosen)

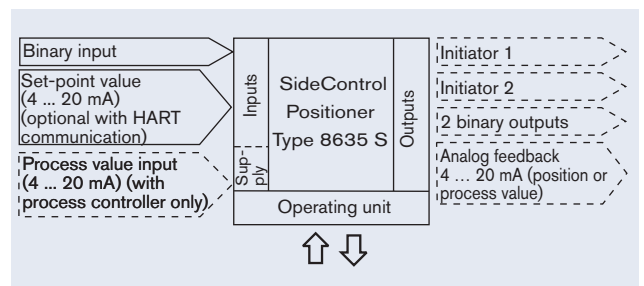

Other software functions on Type 8635 S

- Optional built-in process controller (PID)
- Automatic parametrization of the process controller
- Setting of the parameters of the process controller
- Calibration of the setpoint input and display
- Configuration of the analog input
- Configuration of the binary input and binary outputs

Dimensions [mm]

Interfaces

Note
The optional inputs and outputs are shown by dotted lines.

Ordering chart (excerpt, other versions on request)

Type 8635 PA

Function ¹⁾	Initiator DIN EN 60947-5-6	Position sensor system	Mounting on pneu- matic linear or part-turn actuator	EEx approval (to ATEX)	Item no.

Position sensor system for piston actuators type 27XX, 175 mm/225 mm	655 535

Ordering note

When attached to a Burkert control valve, the SideControl positioner type 8635 PA/S will be supplied only as part of a complete control valve (positioner, position sensor system, associated attached parts and control valve).

- To select a suitable control valve, use the data sheets of types 27XX.
To order a complete control valve, state the following numbers:
the order no. of the SideControl positioner type 8635 PA/S
the order no. of the position sensor system,
the order no. of the selected control valve and
the order no. of the associated attached parts with the remark
SideControl positioner type 8635 PA/S control valve.
- Burkert supplies a completely assembled and tested control valve.
